Giginyu Primary Healthcare
 - Consulted and treated patients with mild conditions in outpatient department
 - Referred patients to appropriate medical facilities and/or specialist for further evaluation and treatment.

2025 - 9/25

- **Medical Doctor**
Giginyu Primary Healthcare
Worked as a volunteer.
 - Consulted and treated patient at outpatient department.
Provided comprehensive primary care, patient education, and preventive health services.
 - Gained exposure to community-level healthcare data and patient trends, enhancing the ability to analyze population health for predictive insights.

11/25 - Present

- **Medical Officer**
Fortis Afri Care Hospital
Performed initial assessment of the medical and physical status of patients
 - Evaluated patient's symptoms
 - Developed treatment plans
 - Prescribed medications and provided patient education
 Manage patient care across internal medicine, pediatrics, obstetrics, and emergency settings.
 - Conduct detailed patient assessments, develop individualized treatment plans, and coordinate diagnostics and follow-ups.
 - Conduct minor surgical procedures and assist in major surgeries.
 - Maintain detailed patient records and track clinical outcomes, providing a strong foundation for clinical data collection and analysis.
 - Experience in managing diverse cases equips me to understand real-world patterns, a key advantage for clinical predictive modeling and healthcare analytics.

KEY STRENGTHS AND POTENTIAL

- **Clinical Expertise:** Solid foundation in internal medicine, pediatrics, obstetrics, and emergency care.
- **Analytical Thinking:** Rapid assessment of patient conditions, critical decision-making under pressure.
- **Adaptability & Learning:** Pursuing data science to integrate AI and analytics into future healthcare solutions.
- **Patient-Centered Care:** Strong communication and education skills to guide patients through complex treatments.
- **Collaborative Teamwork:** Experience working in multi-disciplinary teams across clinical and surgical settings.

PROFESSIONAL DEVELOPMENT GOALS

- Apply data-driven approaches to improve clinical decision-making and patient outcomes.
- Explore AI and machine learning in healthcare for predictive diagnostics

and operational efficiency.

- Contribute to innovative solutions at the intersection of medicine and technology.

PROFESSIONAL SUMMARY

- Medical Doctor with over 4 years of clinical experience in hospital and primary healthcare settings, with strong expertise in patient assessment, diagnosis, treatment planning, and multidisciplinary care.

Currently pursuing a Bachelor's degree in Data Science at Miva Open University, with a strong interest in applying data-driven approaches to healthcare, clinical predictive modeling, and medical data analysis.

Highly motivated to contribute to innovative healthcare technologies by combining frontline clinical experience with developing expertise in data science, artificial intelligence, and healthcare analytics.

SKILLS

- Good patient communication skills • willingness to learn • Ability to work individually or with a team • sense of responsibility • Highly motivated • Taking observations • Patient care • Problem solving • Leadership and management skills • Fast learner and hardworking • Fluent in English, Hausa and Arabic • proficiency in microsoft word and power point.

INTERESTS

- Reading • Travelling • Learning new languages • Watching History documentaries
